

Canon PFI-701 imageprograf refillable cartridge installation procedures

Article Number: 23 | Rating: 5/5 from 1 votes | Last Updated: Sun, Apr 10, 2011 12:53 PM

Installation Notes for Canon ipf imagePrograf 700ml bulk refilling inkjet ink cartridges. The attached document will cover the following items; Our tips, notes and recommendations for proper refilling. These notes above include how you handle the differences required without an actively working ink monitor system. YOU are the ink monitor system and the design of the refillable carts makes this task simple by a raised stacked of 260ml cartridges that are twice the height of the 130ml Canon originals. Bypassing the ink monitor system (also available in the "download version" of your manual from Canon.com Happy savings of 80%+ and only from InkJetCarts.us on quality OEM matched Lucia pigment inks and Canon specially formulated photo dyes. Our Lucid inks will match Canon Lucia inks toe to toe on every benchmark test. Our link to the bottom collar removal is here (for chip recovery purposes);
